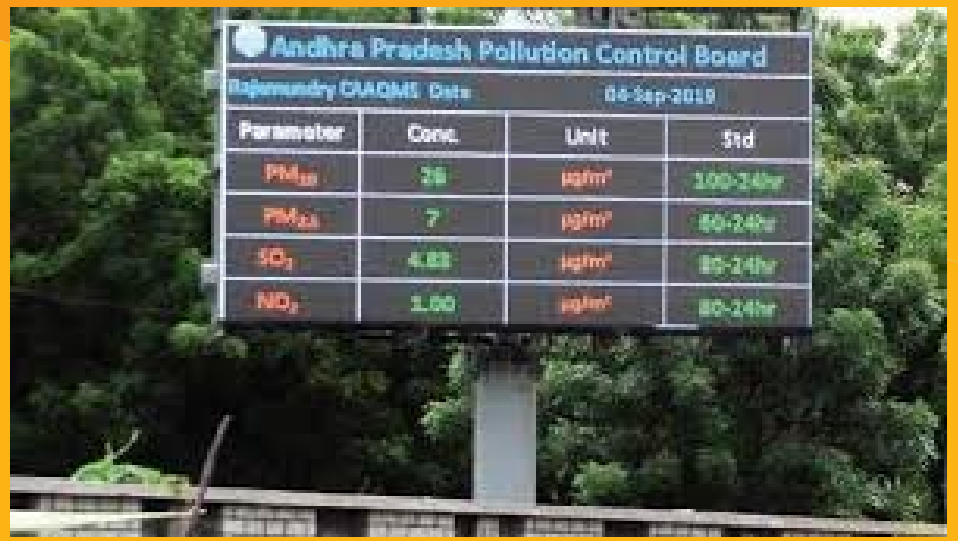
- Parking
- Hotels
- Malls
- Real Estates

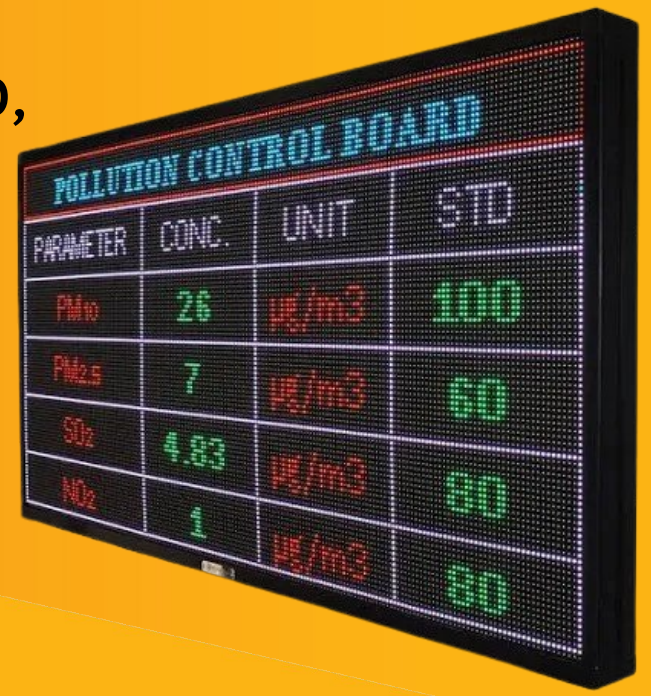
Continuous Ambient Air Quality Monitoring System (CAAQMS) Display Boards

These are **LED display boards** that show real-time air quality data collected from **CAAQMS stations**



Continuous Ambient Air Quality Monitoring System (CAAQMS) Display Boards

Features of CAAQMS Display Boards:



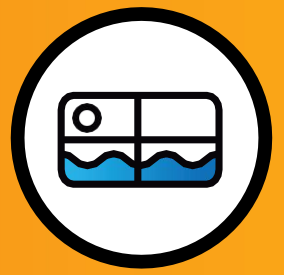
✔ **Real-Time Air Quality Data** – Displays parameters like **PM2.5, PM10, CO, NO_2, SO_2, O_3, temperature, humidity, etc.**
✔ **Weatherproof Design** – Suitable for **outdoor use** with high visibility in sunlight.
✔ **Cloud Integration** – Can fetch data from **CPCB, SPCB, or private AQMS servers.**
✔ **Customizable Display** – Allows setting alerts, messages, and data visualization.
✔ **Remote Connectivity** – Supports **GSM, Wi-Fi, Ethernet, or API-based integration.**

These display boards are commonly used by **pollution control boards, industries, smart cities, and environmental monitoring agencies.**

VIDEO WALL TECHNOLOGY

When you need to create a point of information in a large format that allows operators to view multiple feeds of content clearly and simultaneously, video walls are the right choice for the job.

LED tiles and panels are the primary video wall technology to consider when designing video walls.



Direct-view

- LED video walls

Processing

- Media servers and players
- Video wall processors

LED VIDEO DISPLAY/WALL

Our lineup of indoor LED tiles provides unmatched choice, versatility, and flexibility for high-performance video walls. From premium options to more budget-friendly solutions for high- impact installations, our LED video walls effectively share your content in vibrant and engaging ways.

CERTIFICATION WE HAVE

- BIS License
- 9001:2015 Certificate
- ROHS , CE , FCC , UL – Compliances

Indoor LED Video Display

Outdoor LED Video Display

Outdoor Display

P4mm Outdoor Display - Indian Oil Petrol Pump

P6mm Outdoor Display – Blue Stone Store

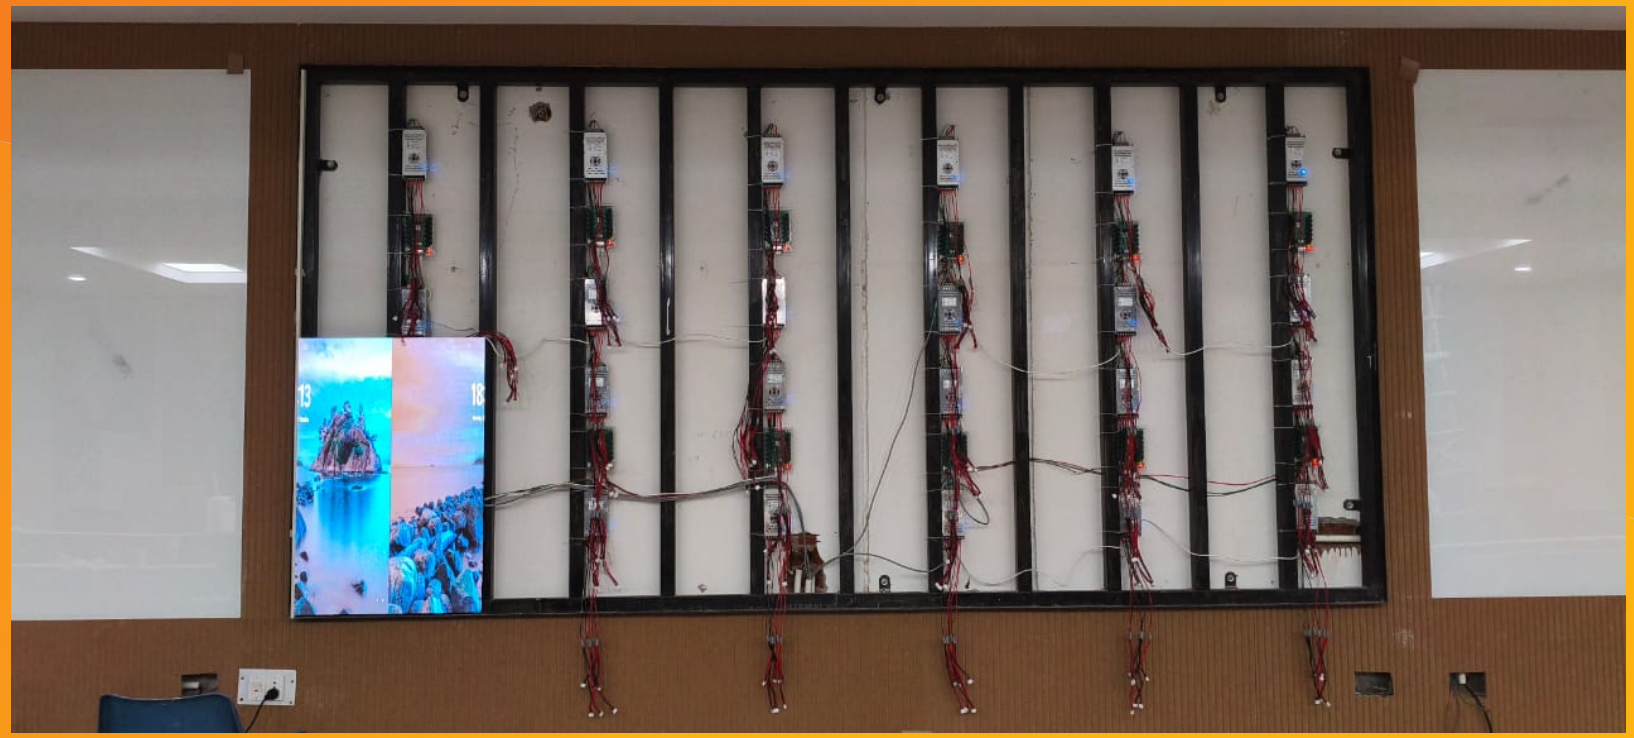
P6mm Outdoor Display - Bangalore Residency Road

P4mm Outdoor Display – SBI Bank

Indoor Display

Step 1: MS Frame Installation

- Mild Steel (MS) frame fabricated and fixed on the wall
- Proper alignment ensured for seamless module installation
- Power supplies and receiving cards mounted securely



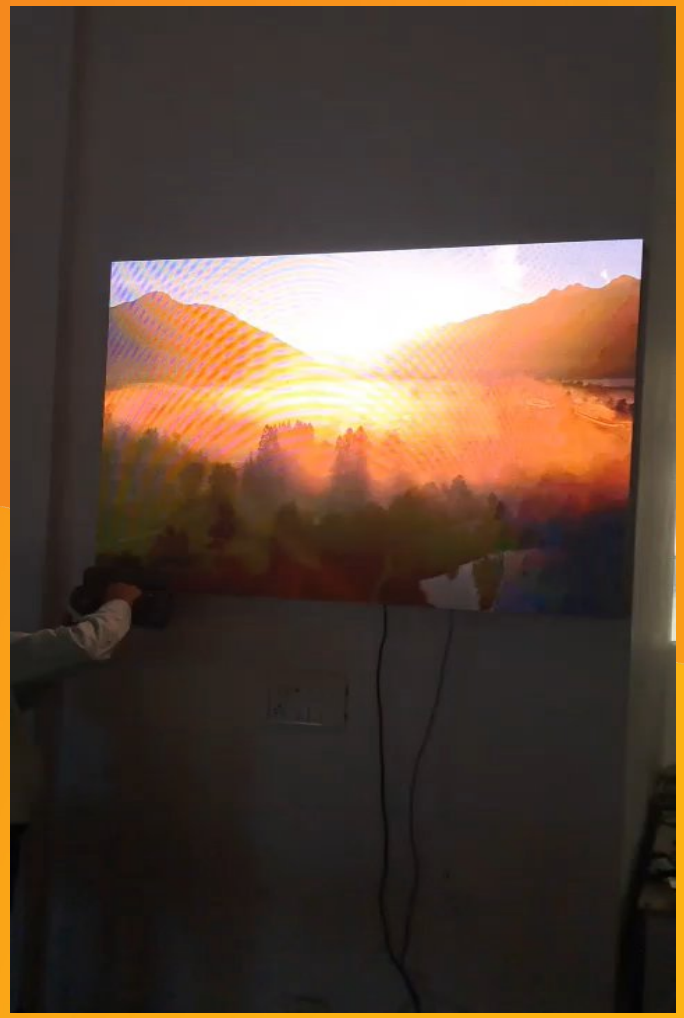
Step 2: Magnetic Module Fixing

- P2.5mm magnetic LED modules mounted on MS frame
- Easy service access from the front
- Modules tested for power and data synchronization

Step 3: Screen Completion

- All modules installed and aligned
- Color calibration and brightness adjustment done
- System tested and ready for use

Live Demonstration : Screen Completion and Maintena



P1.8mm Indoor Display – Conference Hall

THANK YOU — TOGETHER, LET'S MOVE TOWARDS SUCCESSFUL IMPLEMENTATION .
